Re: Donation to County
Payment for Consulting Fees
s Power, SUP 18-0001, 0002 & 0003

Mr. Taylor,

I hope this finds you well. As you may be aware, I represent s Power Development Company ("s Power") and am assisting them with their special use permit applications (collectively "SUP") before Spotsylvania County, Virginia ("County").

As part of the County's review process of my client's SUP applications, it has come to our attention that the County will be required to expend dollars on third party consultants outside of the County's planning department budget. In this regard, we understand that our client's SUP applications are large in scope and complexity, and thus the third party consultants are necessary to review our various studies and analyzes, and to address questions raised by certain citizens in the community. We also want to ensure that the County does not expend dollars outside of its normal budgetary guidelines. Thus, please find enclosed a check, as a donation to the County, in the amount of \$75,000 made out to the County to either pay for or reimburse the County for said consulting services.

If this amount does not cover the aforesaid consulting services, please contact me and we will provide additional sums to address the same.

Please feel free to contact me with any questions.

Respectfully,

Charles W. Payne, Jr.
