

LOCAL STORMWATER MANAGEMENT FUND AND GRANT PROGRAM

July 9, 2019

WHAT IS IT?

Knowing that an individual private property owner's stormwater issues can impact their surrounding neighbors or more, we are proposing a grant program whereby the County would fund private stormwater control projects on previously developed land with public money.

**In accordance with (HB 1614)
Code of Virginia 15.2-2114.01**

PROBLEM BEING ADDRESSED

Developments Prior to 1995 pre-date all stormwater required systems. The first controls installed were for flood control only. As the developments have aged these systems are failing, leaving individual owners responsible for their repairs throughout the County.

HOW IT COULD WORK

- **Application submitted for grant**
- **Review by staff**
- **Approval if it meets standards and funding availability**
- **Construction by applicant**
- **Final inspection**
- **Payment to applicant if it meets approved application and standards**

NEXT STEP

- **General direction from the board**
- **Staff drafts ordinances, standards, specifications, criteria, and guidelines.**
- **Board adopts ordinances and approves standards, specifications, criteria, and guidelines**
- **Board funds program**

DIRECTION NEEDED

Does the board want the staff to pursue the development of a grant program?
